## ASU's Multi-Modal Core Labs Stimulate True Interdisciplinary Research

Date

**May 19, 2020**

Time

**3:00pm – 4:00pm**

Location

**This event will be held via webcast**

**RSVP HERE**

Dr. Guida highlights the impact that access to multi-modal core facility resources has benefited his interdisciplinary research. This seminar is hosted by the Regenerative Medicine Imaging Facility which is part of the Advanced Light Microscopy Core within the Biosciences division. The RMIF provides a range of light microscope systems including various modalities such as fluorescent widefield, confocal, multiphoton, live cell and light sheet microscopy.

TEC Talks: Technology, Expertise, Collaboration. The TEC Talks seminar series, presented by ASU Core Facilities, focuses on cutting edge technology and its practical application. The objective is to drive innovation in discovery, from project conception and funding through data analysis and publication. The goal is achieved by addressing scientific problems with customized solutions and fostering collaborations between researchers and core facility scientists.
